

Prénom :

Mathématiques

$$\frac{\dots}{4} = \frac{\dots}{8} = \frac{\dots}{100} = \frac{\dots}{1\,000} = \dots, \dots = \dots, \dots$$

$$\frac{1}{4} \text{ de litre} = \dots \text{ centilitres}^*$$

$$\frac{1}{4} \text{ de kg} = \dots \text{ g}^*$$

$$\frac{\dots}{2} = \frac{\dots}{4} = \frac{\dots}{8} = \frac{\dots}{10} = \frac{\dots}{100} = \frac{\dots}{1\,000} = \dots, \dots = \dots, \dots = \dots, \dots$$

$$\frac{1}{2} \text{ litre} = \dots \text{ cl}$$

$$\frac{1}{2} \text{ kg} = \dots \text{ g}$$

$$\frac{1}{2} \text{ km} = \dots \text{ m}$$

$$\frac{\dots}{4} = \frac{\dots}{8} = \frac{\dots}{100} = \frac{\dots}{1\,000} = \dots, \dots = \dots, \dots$$

$$\heartsuit \frac{\dots}{4} = \dots$$

$$\heartsuit \frac{\dots}{2} = \dots$$

$$\heartsuit \frac{\dots}{4} = \dots$$

Calcule comme l'exemple. Tu peux dessiner.

$$\frac{3}{2} = 3 \times 0,5 = \dots$$

$$\frac{5}{2} = 5 \times \dots = \dots$$

$$\frac{7}{2} = \dots = \dots$$

$$\frac{10}{2} = \dots = \dots$$

$$\frac{5}{4} = 5 \times 0,25 = \dots$$

$$\frac{9}{4} = \dots = \dots$$

$$\frac{10}{4} = \dots = \dots$$

* 1 centilitre, c'est $\frac{1}{100}$ de litre

* 1 gramme, c'est $\frac{1}{1\,000}$ de kg
