Extracts from wikipedia.org

Sports in the United States of America are an important part of the United States' culture. However, the sporting culture of the U.S. is different from other countries.

For example, soccer, the most popular sport in the world, is not as popular in the U.S.A. compared to the four most popular team sports : baseball, American football, basketball, and ice hockey.

Sport in the United Kingdom plays an important role in British culture. The most popular sport is football, except in Northern Ireland, where Gaelic games are the most popular sports, and Wales, where rugby union is perceived from outside as being the national sport. Cricket is popular in England and Wales.
